

Golden Eagle #2950

Expected life:

Indefinite, depending upon proper care and maintenance. TASCOCO recommends replacing the ear cushions every 3-4 months and/or when the cushions become cracked, damaged, or lose their softness due to normal wear and tear. Use only TASCOCO Soft-Seal™ cushions for guaranteed performance and maximum comfort.

Storage:

Earmuff type hearing protectors with padded head bands should be stored flat and away from high heat areas, or areas where excessive dust, dirt or moisture is present.

Cleaning:

TASCOCO recommends using mild soap and water to clean the ear cushions, dampers, or plastic components whenever necessary. DO NOT USE SOLVENTS. For more information please contact TASCOCO Corporation.

Instructions For Use

Place protector on head as shown (fig.1). Adjust the height of the cups (fig.2) so they fully enclose the ears and the cushions exert equal pressure around the ears. For best performance, pull hair back and out from underneath the cushions as much as practical.

Fig. 1

Fig. 2

Frequency in Hz	125	250	500	1000	2000	3150	4000	6300	8000
Mean (dB) Attenuation	20.7	25.2	35.2	43.4	36.0	35.3	37.3	36.0	36.3
Standard Deviation	2.5	1.9	2.5	2.4	2.0	1.9	2.0	1.5	2.2
NRR=29dB									

Tested in accordance with ANSI S3.19 1974

INFORMATION REQUIRED BY E.P.A.

The level of noise entering a person's ear, when hearing protector is worn as directed, is closely approximated by the difference between the A weighted environmental noise level and the NRR.

Example:

1. The environmental noise level as measured at the ear is 92 dBA,
2. The NRR is 29 decibels (dB).
3. The level of noise entering the ear is approximately equal to 63 dB

Caution

Far noise environments dominated by frequencies below 500 Hz the C-weighted environmental noise level should be used.

NOISE REDUCTION RATING	29 DECIBELS (WHEN USED AS DIRECTED)
THE RANGE OF NOISE REDUCTION RATINGS FOR EXISTING HEARING PROTECTORS IS APPROXIMATELY 0 TO 30 (HIGHER NUMBERS DENOTE GREATER EFFECTIVENESS)
